

Stevensdrake solicitors, a leading South East commercial, business and family law firm selects PAV I.T. Services for their backup and disaster recovery solution

Stevensdrake is an award-winning law firm based in the South East with history dating back to 1782. Having maintained Lexcel accreditation, the Law Society's quality mark for excellence in legal practice management and client care since 2005, they are also recognised by the leading independent legal directory, The Legal 500.

Stevensdrake solicitors, a leading South East commercial, business and family law firm, selected PAV i.t. Services for their backup and disaster recovery solution.

The customer previously used an on-premises solution, but motivated by the lower TCO, greater flexibility for doubling front-end data size at no extra cost, and to avoid restriction on the amount of data that they could back up, the customer chose to move to PAV's cloud-based Backup as a Service (BaaS) and Disaster Recovery as a Service (DRaaS).

PAV's Backup and Disaster Recovery Service provides businesses with a fully managed, powerful and configurable data management platform, capable of protecting and recovering data from all their data sources including physical and virtual servers, public cloud and SaaS as well as disaster recovery functionality to replicate critical business systems, which can then be rapidly recovered.

"Having worked with PAV i.t Services as a trusted advisor for our IT requirements for many years, we had a high level of confidence in their experience and expertise to propose a managed cloud backup and DR solution which matched our business requirements, giving us a scalable and cost effective solution which provided us with the assurance our data is both fully protected and available."
