

ORIIUM's range of Appliances provide organisations with a powerful, modular and scalable data management solution, incorporating all of Commvault's market leading features and functionality in a simple and fast to deploy, flexible hardware and software solution. With both standard and hyperscale options available.

Scale Out

Plug-in and scale-out appliances range from 11TB to 306TB to meet the demands of fast-growing customers

Core Backup and Recovery

Unparalleled support for physical & virtual servers, applications, public cloud services, O365 and other SaaS services

Hybrid Cloud

Store your data anywhere - Sync and replicate data to any compatible cloud platform of your choice

Complete Solution

Comprehensive backup, disaster recovery, archive and data governance in an appliance all via one simple Web UI

Simple

Pre-configured appliances can be installed quickly and easily. Start protecting your data in under an hour

24/7 Support

Our team of experienced support consultants are on hand 24/7/365. Fully managed options are available

Our Appliances provide quick-to-deploy, modular local backup and recovery with the added benefit of cloud-based off-site data replication (Secondary data sync) and disaster recovery.

ORIIUM Appliance not only protects all of your local data, it can also orchestrate the protection of your public cloud and SaaS workloads from a single simple to use web GUI.
