

Introducing ORIIUM SaaS powered by Commvault, an Enterprise-grade backup and disaster recovery service supporting data centre, multi-cloud, SaaS and hybrid environments. For more than 20 years Commvault technology has provided flexible, powerful, highly-configurable data management solutions enabling protection and recovery of your data and systems.

Now ORIIUM can deliver these to you as SaaS, enabling you to be up and running in as little as one hour with no big up-front investment or annual commitment.

Pay For What You Use

Pay as you consume with no up-front costs and a monthly rolling contract. Scale up or down on demand as required

Core Backup and Recovery

Unparalleled support for physical & virtual servers, applications, public cloud services, O365 and other SaaS services

Hybrid Cloud

Store your data anywhere - Sync and replicate data to any compatible cloud platform of your choice

Complete Solution

Comprehensive backup, disaster recovery, archive and data governance all via one simple Web UI

Simple

You can be up and running in as little as an hour with no hardware required

24/7 Support

Our team of experienced support consultants are on hand 24/7/365. Fully managed options are available

ORIIUM SaaS provides customers with the ultimate flexible Data Management service on the cloud infrastructure of their choosing. Deploy across your current cloud platforms to deliver the best Data Management platform available to protect, secure and manage your critical data.

Alternatively, leverage your on-premise infrastructure to retain local copies, replicate data to the cloud and recover to a DR target of your choice. Scale as your business grows with no commitment.
